3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

PHYSICAL APPEARANCE: Sheets of Various Colors

IMMEDIATE CONCERNS: No unusual dermatitis hazard is expected from routine handling. Molten Polymer on skin may cause thermal burns.

This Product is not respirable as marketed - if irritation should occur, moved to a ventilated location.

POTENTIAL HEALTH EFFECTS

EYES: Mechanical Irritation.

SKIN: No data are available. However, based on experience with handling these polymers, no unusual dermatitis hazard is expected from routine handling. Molten polymer contacting the skin will cause thermal burns.

INGESTION: The oral LD-50 in rats using one type of EVA is in excess of 1,000 milligrams per kilogram of body weight. Two week metabolic tests with dogs and rats showed no significant amount of polymer was retained by the animals. 90-day feeding studies in rats showed that EVA resins have low toxicity. Slight liver effects seen in animals fed diets containing 10% EVA; no effects were seen with diest 5% EVA. Overall, no important body systems or organ dysfunction occurred at either does level.

INHALATION: Polymer is not respirable as marketed. At processing temperatures above 204 degrees C, fumes irritating to the eye, nose and throat may be produced. Exposure may result in redness, tearing and itching in the eyes together with soreness in the nose and throat with coughing.

MEDICAL CONDITIONS AGGRAVATED: None Known

4. FIRST AID MEASURES

EYES: Flush eye thoroughly, for minimum 15 minutes with water. Get medical help if discomfort persists.

SKIN: The compound is not likely to be hazardous by skin contact but cleansing the skin after use is advisable. If burned by contact with molten material, cool as quickly as possible with water and see physician for treatment of the burn if necessary.

INHALATION: Remove to fresh air. Get medical help if discomfort persists.

5. FIRE FIGHTING MEASURES

GENERAL HAZARD: Solid material may burn at or above the flashpoint, and airborne dust may explode if ignited. Toxic gases will form upon combustion. Static discharge, material can accumulate static charges which can cause incendiary electrical discharge.

EXTINGUISHING MEDIA: Water, Foam, Dry Chemical. CO₂

FIRE FIGHTING PROCEDURES: Use water spray to cool fire exposed surfaces, protect personnel and extinguish the fire. Respiratory and eye protection are required for fire fighting personnel.

HAZARDOUS DECOMPOSITION PRODUCTS: Oxygen-lean conditions may produce carbon monoxide and irritating smoke. Acetic Acid.

6. ACCIDENTAL RELEASE MEASURES

SMALL SPILL: Shovel or vacuum up spilled product and place in closed container for disposal. Do not flush into sewer, stream or other bodies of water.

7. HANDLING AND STORAGE

HANDLING: See First Aid and Personal Protective Equipment Sections.

STORAGE: Store in a cool, dry place. Keep container closed to prevent contamination.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS: VENTILATION - Local ventilation must be used over processing equipment to maintain vinyl acetate concentrations in air below the PEL.

Use static controls. Static charges can build up and ignite dust or solvent laden atmospheres.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Wear Safety glasses with side shields where contact is likely with open ambient temperatures. (-18 to 38 deg C / 0 -100 degrees F)

SKIN: Recommend gloves to prevent skin irritation in hypersensitive individuals.

RESPIRATORY: A NIOSH/MSHA approved type respirator with organic vapor cartridge with dust mask/filter may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits.

PROTECTIVE CLOTHING: Where contact with hot material may occur, wear thermal resistant gloves, arm protection, protective footwear and a face shield.
