Light-Cure Orthodontic Adhesive

Resilience® Light-Activated Orthodontic Bonding Systems

Provides the optimum properties for bonding ceramic, metal, or plastic brackets using light-cure technology. The smooth, tacky composite resin delivers ideal handling characteristics which eliminates bracket flotation and allows for easy flash clean up. Light activation provides additional working time to ensure accurate bracket placement. Produces a strong light cured chemical bond which also debonds easily. Archwires can be placed immediately after fully curing the brackets. Contains fluoride to help protect against potential decalcification.

A. Light-Activated Syringe Kit
Item #: FC-RESI-006
1 kit .................................... $119.95 ea.
3 or more ................................ $111.95 ea.
4x 3.5 gm syringes, 7 mL sealant resin,
1x 4 gm green gel etchant syringe with 5x
22 gauge syringe tips, 2x 10 cavity mixing
wells, 1x 50 sheet mixing pad (1½" x 2½"),
1x brush holder with 40x ¾" brushes, and
10x 2" brushes

Separate Refill Components
Light-Activated Refill Syringe
Item #: FC-RESI-017 .................... $29.95 ea.
3.5 gm per syringe

Sealant Resin
Item #: FC-RESI-019 .................... $45.95 ea.
7 mL per bottle

B. Light-Activated Capsule Kit
Item #: FC-RESI-047
1 kit .................................... $127.95 ea.
3 or more ................................ $112.95 ea.
40x .35 gm capsules, 1x 7 mL sealant resin, 1x
9 gm green liquid etchant, 1x 50 sheet mixing
pad (2½" x 2½"), and 50x 2" brushes

Separate Refill Components
Light-Activated Refill Capsules
Item #: FC-RESI-018 .................... $92.95/pk
40x .35 gm capsules

Conditioner/Primer
For use when bonding to special surfaces.
Plastic Conditioner
Item #: OT-PL ............................ $21.95 ea.
15 mL per bottle

Porcelain Conditioner
Item #: OT-PO ............................ $21.95 ea.
15 mL per bottle

Metal Primer
Item #: OT-ME ............................ $21.95 ea.
15 mL per bottle

Hazardous materials, special shipping required.

C. Capsule Gun
Item #: FC-SELE-004 .................... $46.95 ea.

D. Light-Activated Introductory Kit
Item #: FC-RESI-006SK ................ $31.25 ea.
1x 3.5 gm syringe adhesive, 1x 3 mL sealant,
5x 2½" bonding brushes, 1x instruction sheet

Resilience® Low Viscosity Light-Cure Flowable Composite

Resilience Low Viscosity Light-Cure Flowable Composite adhesive features a precision controlled syringe which prevents overflow and run-on. It ensures accuracy as it flows easily into difficult areas, but is reliable not to slump or run until light curing occurs. The disposable tip provides precise application, accessibility, and control resulting in excellent aesthetics. It is dependable, strong, and more resistant to shock and stress. It can be used in many ways such as bonding lingual retainers, Invisalign® attachments, occlusal build-ups for opening a posterior bite, indirect bonding, and much more! Contains fluoride to help protect against potential decalcification.

LV Flowable Composite Kit
Item #: FC-RESI-007
1 kit...........................................$87.95 ea.
3 or more .....................................$81.95 ea.
1 x 1.6 gm syringe green etchant, 3x 2 gm flowable composite syringes, 1x 3 mL light cure enamel bonding sealant resin, 25x Flowthru™ 22 gauge syringe tips, 10x 2½” bonding brushes, instructions

LV Flowable Composite Syringe
Item #: FC-RESI-008
1 syringe....................................$20.95 ea.
3 or more ...................................$18.95 ea.
1x 2 gm flowable composite syringe and 10x Flowthru™ 22 gauge syringe tips

Separate Refill Components
Sealant Resin
Item #: FC-RESI-019
1 bottle.................................$45.95 ea.
7 mL per bottle

Needle Tips
Item #: 272-002
1 pack .........................$10.50/pk
25x Flowthru™ 22 gauge syringe tips

Resilience® Primer-Activated Orthodontic Bonding Systems

Provides the optimum properties for bonding ceramic, metal, or plastic brackets using a primer activated no-mix bonding system. This is a chemically cured system which does not require pre-mixing. The thick tacky composite resin delivers ideal handling characteristics which eliminates bracket flotation and allows for easy flash clean up. Produces a strong chemical bond which also debonds easily. Archwires can be placed 5 minutes after bonding the last bracket. Contains fluoride to help protect against potential decalcification.

A. Primer-Activated Syringe Kit
Item #: FC-RESI-012
1 kit........................................$109.50 ea.
3 or more .................................$103.50 ea.
4x 3.5 gm syringes, 1x 9 mL enamel catalyst primer, 1x 4 gm green gel etchant syringe with 5x 22 gauge syringe tips, 2x 10 cavity mixing wells, 1x 50 sheet mixing pad (1⅛” x 2½”), 1x brush tip holder with 40x ¾” brushes, and 10x 2” brushes

B. Primer-Activated Syringe Introductory Kit
Item #: FC-RESI-012SK
1 kit ........................................$31.25 ea.
1x 3.5 gm adhesive syringe, 1x 3 mL primer, 5x 2 ½” bonding brushes, 1x instruction sheet

Separate Refill Components

Primer-Activated Syringe
Item #: FC-RESI-024
1 syringe ..................................$29.50 ea.
3.5 gm per syringe

Enamel Catalyst Primer
Item #: FC-RESI-027
1 bottle ..................................$31.50 ea.
9 mL per bottle

Conditioner/Primer
For use when bonding to special surfaces.
Plastic Conditioner
Item #: OT-PL
1 bottle ..................................$21.95 ea.
15 mL per bottle

Porcelain Conditioner
Item #: OT-PO
1 bottle ..................................$21.95 ea.
15 mL per bottle

Low Viscosity Gel Allows for Controlled Use!

Resilience® Light-Cure Band Cement

Light-Cure Single Component Push Syringes
A light-activated band cement in a single paste system which provides a longer working time and a rapid setting time. Can be placed directly into bands. Excess flash is easy to clean up prior to the light curing and the cement is easy to see due to the blue color. Contains fluoride to reduce the chance of decalcification.

Multi-Cure Band Cement

Resilience® Glass Ionomer Paste/ Paste Band Cement
A multi-cure fluoride containing glass ionomer band cement in a two paste system which offers a dual curing capability. May be used with or without a curing light. There is approximately a 3 minute working time and 10 minute set time without use of curing light.

Multi-Cure Economy Kit
Item #: FC-GRAN-061
1 kit................. $133.25 ea.
3 or more ............. $118.25 ea.
4x 5 gm base and 4x 5 gm catalyst, 2x 50 sheet mixing pads (2 ¾" x 2 ¾"), 10x spatulas, 1x instructions for use

Light-Cure Band Cement

Light-Cure Band Cement Kit
Item #: FC-RESI-038
1 kit.................. $133.25 ea.
3 or more ............. $124.25 ea.
6x 5 gm push syringes

Refill Syringes
Item #: FC-RESI-041
1 syringe ............ $30.25 ea.
5 gm per syringe

Resilience® Glass Ionomer Powder/Liquid Band Cement

A two part glass ionomer band cement system of powder and liquid. It contains fluoride which reduces the incidence of decalcification. Resilience chemically bonds to enamel without the use of etchants. It has a low film thickness and will not wash out under bands. The final setting time is 6 to 7 minutes.

Discover The GC Fuji Difference Bonds Perfectly In A Wet Field!

**GC Fuji ORTHO™ LC Bracket Adhesive**
- Bond in a Wet Field
- No Etch Required
- Significant Fluoride Release and Recharge

Now you can work faster and easier; and get all the strength needed, with little chance of decalcification (white spots) and enamel damage at debonding. Fuji ORTHO LC delivers benefits that composite resins cannot claim. A continual fluoride release promotes remineralization and helps maintain the soundness of the enamel.

- Clinically proven. Fuji ORTHO LC offers significant advantages over composite bonding systems and greatly reduces chairtime.
- Fuji ORTHO LC features low sensitivity to moisture and can be used in the presence of saliva.
- Fuji ORTHO LC bonds metal and porcelain brackets and metal bands to enamel.

**Light Cure Standard Kit**
- Item #: 439403
  - 1 kit ....................... $372.95 ea.
  - 2 or more ............... $365.95 ea.
  - 1 x 40 gm powder, 2 x 6.8 mL liquid, 1 x scoop, and 1 x mixing pad

**Refill Components**
- Powder Refill
  - Item #: 000029

Secure online ordering via the internet www.orthotechnology.com
The Cybird XD advanced curing light is designed particularly for the orthodontic professional in need of super-fast light curing and bonding speed to reduce chair time. It features two powerful curing modes to choose from for practice preference.

**Reduce Bonding Time**
The Traditional High Power Mode (1,500 mW/cm²) allows you to polymerize light-cured adhesives at 5, 10, 15, or 20 second intervals.

**Wide Application Range**
The Cybird XD LED produces a variable wavelength range of 430-490 nm, assuring full curability of a wide range of adhesives.

**Functional Aesthetics**
The ergonomically shaped curing light is well-balanced for ideal handling. Cybird XD’s square body prevents roll-off at chairside tables and is shaped for a more natural grasp.

**Clever Construction**
Built from industrial grade lightweight aluminum. The turbo 8 mm fiber-optic light guide and sleek body design grants superb oral access for effortless usability.

**Intuitive Keypad**
Practitioners save time with simplicity: a shot button and a mode selector / timer button for various applications.

**1 Year Limited Warranty**

**3-STEP TECHNIQUE**

**STEP 1**
FILL the selected Mini-Mold Tip with light-cure resin

**STEP 2**
PLACE the Mini-Mold Tip on desired tooth

**STEP 3**
LIGHT-CURE the Mini-Mold Tip for 5-20 seconds

With the Cybird XD Advanced LED Curing Light from Ortho Technology on page 112

**Mini-Mold™ Starter Kit**
- Safe for sensitive patients
- Saves chair time and money
- Invisible aesthetic attachments
- Fast 5-20 seconds cure time

Item #: 51399
$194.95/kit
Kit includes: 30x Mini-Mold Tips 3 of each style, 2x tip handles, and detailed step-by-step instructions

Fully Exposes Both Arches to Provide Maximum Access
- Direct and indirect bonding procedures
- Full field access
- Interproximal stripping
- Bite registration
- Photography
- Debonding
- Microetching

Advantages:
- Unique intraoral extensions retract buccinator muscles
- Provides unobstructed view and superior buccal access
- Maintains accessibility during all types of procedures
- Safe for autoclave and dry heat sterilization up to 350°F/177°C

High Heat Cheek Retractor
The easy to use, one size fits all Cheek Retractor that provides superior intraoral access. The unique buccal extensions retract powerful buccinator muscles for maximum access. Made of high quality medical grade materials that withstand repeated sterilization.

- Maximum patient comfort
- Easy tension control
- Boosts visibility to intraoral work areas
- Made in the USA

Item #: 601-190
1 retractor ............ $20.25 ea.
3 retractors .............. $18.25 ea.

Dry Field System

Achieve Total Bonding Success...

- Full Arch Access for Bonding
- Adjustable to Arch Length
- Maximum Patient Comfort
- Excellent Soft Tissue Retraction
- Fully Autoclavable to 280°F/135°C
- Reduces Bond Failure
- Prevents Treatment Delays

The Nola Dry Field System completely eliminates saliva and fully exposes both arches making it ideal for all bonding applications.

The system is easy to assemble, be inserted, and used by a single operator. The entire system is completely autoclavable making clean-up easy.
