Introducing **NEW!**

Rincinol P.R.N.

First non-Rx bio-adherent mucosal coating
for fast, long-lasting pain relief and healing.

Relieves and Protects:

Rincinol™ P.R.N. forms an exceptional bio-adhesive protective barrier over the mucosal surface that quickly provides pain relief for up to 6 hours. Rincinol™ P.R.N. promotes healing, and won't numb, sting or burn.

Key ingredients coat, soothe, hydrate and promote healing.

Easy to use:

Formulated as an oral rinse, so no messy applicators, and no need for patient/professional to locate site or touch tissue.

Safe and effective:

no reported side effects or drug interactions; safe for adults and children 6+, even if accidentally ingested.

Broad range of applications including:

- Aphthous ulcers and other oral lesions
- Irritation from orthodontic appliances and removable prosthetics
- Post-oral surgery and other soft tissue management procedures such as root planing, scaling and prophylaxis treatment
- Oral tissue trauma from a variety of other causes

Available in convenient individual dose packs for dental practices. Along with dose packs, 4 oz. bottles will also be available to patients at most major chain drugstores and other selected retail outlets.

Inexpensive to provide patient sample.

3 year shelf life.

No Rx needed.

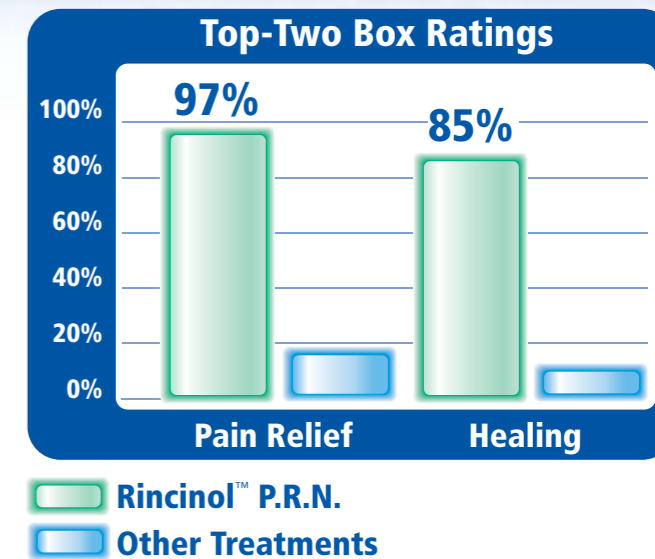

Clinically proven to reduce pain in 97% of patients⁸

- Most patients reported rapid pain relief
- No side effects were reported
- Patients were positive about the taste and ease of use of Rincinol™ P.R.N.

85% of patients surveyed found Rincinol™ P.R.N. "easy" to use⁹

- Rincinol™ P.R.N. took an average of 3 minutes, 14 seconds to work
- Pain relief lasted 5.5 hours on average
- No one felt it was difficult to use

4 key ingredients combine to provide a unique mechanism of action to quickly soothe pain and promote healing without side effects.

1. **Polyvinylpyrrolidone:** muco-adherent that forms thin, protective coating.¹
2. **Sodium Hyaluronate:** muco-adherent and film forming agent² enhances tissue hydration to promote healing.^{3,4} Shown to accelerate wound healing in animal models and in various human wounds.^{3,4}
3. **Glycyrrhetic Acid:** shown to inhibit inflammation in anti-inflammatory models.^{5,6,7}
4. **Aloe Vera:** soothing and healing qualities; hydrates tissue
