Confidence*

# Comfort and Confidence

## Designed With You In Mind

Lotus Plus® Brackets are small in size and have a smooth, contoured design which ensures maximum patient comfort. Lighter archwires are recommended with the Lotus Plus System so that gentler force is used resulting in less pressure and pain during treatment.

The unique design of the Lotus Plus System allows unrestricted access that makes maintaining superior oral hygiene a breeze. Because the Lotus Plus Bracket has a built-in clip, it eliminates plaque concerns associated with other systems that require elastics to hold the archwires.

The Lotus Plus System is designed for quick and easy adjustments by the doctor, which means you'll spend less time in the orthodontic office. Because the Lotus Bracket has such an innovative design, overall treatment time may be shortened, so you can achieve and proudly display the beautiful smile you've always wanted.
