# THE SCIENCE OF PRECISION BONDING

**Resilience**  
Orthodontic Bonding Solutions

## Light-Cure Orthodontic Adhesive

The light-activated system provides the optimum properties for bonding ceramic, metal or plastic brackets to teeth. Delivers ideal handling characteristics which eliminate bracket flotation and allow for easy flash removal. Produces a quick setting, strong mechanical bond which debonds easily. Contains fluoride to help protect against potential decalcification.

AS LOW AS  
**\$59<sup>55</sup>**  
each

## No-Mix Orthodontic Adhesive

Provides the optimum properties for bonding ceramic, metal, or plastic brackets using a primer activated no-mix bonding system. This is a chemically cured system which does not require pre-mixing. The thick tacky composite resin delivers ideal handling characteristics which eliminates bracket flotation and allows for easy flash clean up.

## Primer-Activated Syringe Kit

Item #: FC-RESI-012  
1 kit..... **\$125.10 ea.**  
3 or more ..... **\$119.10 ea.**  
4x 3.5 gm syringes, 1x 9 mL enamel catalyst primer, 1x 4 gm green gel etchant syringe with 5x 22 gauge syringe tips, 2x 10 cavity mixing wells, 1x 50 sheet mixing pad (1 5/8" x 2 1/8"), 1x brush tip holder with 40x 3/4" brushes, and 10x 2" brushes
